■ Product Overview

InventoryPro is a professional desktop application for businesses that need to manage inventory, create sales orders, track purchase orders, and run their operations efficiently. Built on proven technology, it's a complete business management solution that works 100% offline.

One-time payment. No subscriptions. Your data stays on your computer.

■ Pricing & Value Proposition

\$500 One-Time Purchase

- ✓ Unlimited products, orders, customers
- ✓ Unlimited users (single business)
- ✓ Free updates for life
- ✓ Works completely offline
- ✓ No monthly fees ever
- ✓ You own your data
- ✓ Email support included

Competitive Comparison

Competitor	Annual Cost	Your Savings
Fishbowl	\$4,395+	\$3,895+
Cin7	\$3,588-\$7,188	\$3,088-\$6,688
QuickBooks + Inventory	\$600-\$2,400	\$100-\$1,900
NetSuite	\$12,000+	\$11,500+

InventoryPro saves you \$3,000-\$10,000+ per year!

■ Complete Feature Set

■ 1. Inventory Management

Product Catalog:

- Unlimited products with SKUs and barcodes
- Product categories, tags, and variants (size, color, etc.)
- Multiple product images and specifications
- Cost price and sell price tracking
- Barcode/QR code generation and scanning
- Custom product fields and bulk import/export

Stock Management:

- Real-time stock levels across multiple warehouses
- Stock adjustments with reason codes
- Stock transfers between locations
- Minimum stock level alerts and reorder notifications
- Stock valuation (FIFO, LIFO, Average)
- Serial number and batch/lot tracking
- Expiry date tracking
- Automatic stock reservations

■ 2. Sales Order Management

Order Processing:

- Create sales orders with drag-and-drop interface
- Quote-to-order conversion
- Order status tracking (Draft, Confirmed, Picking, Packed, Shipped, Delivered)
- Partial fulfillment and backorder management
- Order priority levels and split shipments
- Order templates for repeat customers
- Bulk order processing

Pricing & Discounts:

- Customer-specific pricing and volume discounts
- Promotional pricing and discount codes
- Price lists by customer tier
- Automatic tax calculation
- Shipping cost calculation
- Multiple payment terms

Fulfillment:

- Pick lists and packing slips generation
- Shipping label integration
- Tracking number management
- Returns & refunds processing
- Credit notes and replacement orders

■ 3. Purchase Order Management

Supplier Management:

- Supplier database with performance tracking
- Lead time tracking and price comparisons
- Multiple contacts per supplier
- Supplier payment terms and ratings

Purchase Orders:

- Create POs with auto-suggestions based on reorder points
- PO templates and automatic PO generation
- PO approval workflow
- Status tracking (Draft, Sent, Confirmed, Partial, Complete)
- Cost tracking and comparison
- Email POs directly to suppliers
- PO history and audit trail

Receiving:

- Goods received notes (GRN) with partial receiving
- Quality check notes and damaged goods handling
- Return to supplier process
- Auto-update stock levels
- Cost variance tracking

■ 4. Customer Relationship Management

- Unlimited customers with categories/segments
- Credit limit and payment terms management
- Customer pricing tiers
- Multiple delivery addresses
- Purchase history and lifetime value tracking
- Order frequency analysis
- Payment history and outstanding balances
- Email order confirmations and shipping notifications

■ 5. Reporting & Analytics

Comprehensive Reports:

- Sales Reports: by product, category, customer, salesperson
- Inventory Reports: stock valuation, movement, turnover, aging
- Financial Reports: A/R aging, A/P aging, profit & loss, COGS
- Operational Reports: fulfillment time, supplier performance, returns

■ 6. Business Operations

Multi-Warehouse Support:

- Unlimited warehouses/locations
- Inter-warehouse transfers
- Stock by location tracking
- Location-specific pricing
- Bin/shelf location management

Barcode System:

- Barcode generation (EAN, UPC, Code128, QR)
- Label printing with customizable templates
- Barcode scanner integration
- Mobile scanning app
- Batch scanning for receiving and picking

Automation:

- Auto-reorder when stock reaches minimum level
- Auto-generate purchase orders
- Auto-email notifications to customers and suppliers
- Auto-update stock levels on order fulfillment
- Scheduled reports
- Batch operations and workflow automation

■ 7. Financial Integration

- Convert orders to invoices automatically
- Professional invoice templates with branding
- Partial invoicing and recurring invoices
- Credit notes and payment tracking
- Multiple payment methods and partial payments
- Payment reconciliation and history
- Export to QuickBooks, Xero, CSV/Excel
- Tax calculation and multi-currency support

■ 8. Security & Compliance

- Local data storage with encryption option
- User authentication and role-based access control
- Activity logging and audit trail
- Automatic backups with restore capability
- Multiple user accounts with permission settings
- GDPR-friendly (local data storage)
- Tax compliance and document retention

■ ■ Complete Database Schema

InventoryPro is built on a robust SQLite database with 25+ tables designed for scalability and performance. Here are the core tables:

Core Tables:

- products - Complete product catalog with SKU, pricing, stock levels
- stock_levels - Multi-warehouse inventory tracking with reservations
- warehouses - Multiple location management
- customers - Customer database with credit limits and terms
- suppliers - Supplier management with performance metrics
- sales_orders - Sales order header with status tracking
- sales_order_items - Line items for sales orders
- purchase_orders - Purchase order management
- purchase_order_items - PO line items with receiving status
- stock_movements - Complete audit trail of all stock changes
- invoices - Financial invoicing linked to orders
- payments - Payment tracking and reconciliation
- stock_adjustments - Manual stock corrections with reasons
- price_lists - Customer-specific pricing
- product_suppliers - Product-supplier relationships
- ...and 10+ more supporting tables

Database Features: Optimized indexes for fast queries • Foreign key constraints for data integrity • Triggers for automatic calculations • Views for complex reports • Full audit trail • Supports 100,000+ products without performance degradation

■ Target Markets

Perfect For These Industries:

Industry	Use Cases
Retail Stores	Multi-location inventory, POS integration, customer loyalty
Manufacturing	Raw materials, WIP tracking, BOM management, production orders
Distributors	Multi-warehouse, bulk orders, supplier management
E-commerce	Online/offline sync, marketplace integration, shipping
Construction	Job-based inventory, equipment tracking, subcontractor POs
Restaurants	Recipe ingredients, vendor management, portion control
Medical Supply	Expiry tracking, serial numbers, compliance reporting
Fashion/Apparel	Variants (size/color), seasonal inventory, style tracking
Electronics	Serial numbers, warranty tracking, supplier sourcing

Business Size:

- Startups to mid-size businesses (1-50 employees)
- 100 to 100,000+ SKUs
- \$100K to \$10M annual revenue
- Single or multiple locations
- B2B, B2C, or hybrid business models

■ Why Choose InventoryPro?

vs. Spreadsheets

- ✓ Real-time inventory tracking (no manual updates)
- ✓ Automatic calculations (no formula errors)
- ✓ Multi-user support without conflicts
- ✓ Professional documents and reports
- ✓ Complete audit trails
- ✓ Scalable to 100,000+ SKUs

vs. Cloud Solutions

- ✓ One-time payment (no monthly fees)
- ✓ Your data stays local (complete privacy)
- ✓ Works 100% offline (no internet required)
- ✓ Faster performance (no network latency)
- ✓ No vendor lock-in (you own the software)
- ✓ No price increases (locked-in cost)

vs. Enterprise Software

- ✓ 90% less expensive (\$500 vs \$5,000-50,000)
- ✓ No implementation fees or consultants
- ✓ No training required (intuitive interface)
- ✓ Setup in minutes (not weeks or months)
- ✓ Easy to use (not overly complex)
- ✓ Free lifetime updates

■ Return on Investment Calculator

See how InventoryPro pays for itself in days, not months:

Time Savings (Conservative Estimates):

Task	Time Saved/Week	Annual Value @ \$40/hr
Manual inventory updates	10 hours	\$20,800
Data entry & reconciliation	5 hours	\$10,400
Report generation	3 hours	\$6,240
Order processing	5 hours	\$10,400
Supplier communication	2 hours	\$4,160
TOTAL TIME SAVINGS	25 hours/week	\$52,000/year

Error Reduction Savings:

- Prevent stockouts (lost sales): \$10,000-\$100,000/year
- Reduce overstocking (dead inventory): \$5,000-\$25,000/year
- Eliminate data entry errors: \$5,000-\$20,000/year
- Accurate cost tracking: \$3,000-\$15,000/year
- Better supplier negotiations: \$2,000-\$10,000/year

Total First Year ROI:

Investment	\$500 one-time
Time Savings	\$52,000
Error Reduction	\$25,000-\$170,000 (conservative)
Software Savings	\$3,000-\$12,000 (vs subscriptions)
Total First Year Value	\$80,000-\$234,000
ROI Percentage	16,000% - 46,800%
Payback Period	2-3 days!

■ System Requirements

Component	Minimum	Recommended
Operating System	Windows 10, macOS 10.13+, Linux	Windows 11, macOS 13+, Ubuntu 22+
RAM	4GB	8GB+
Disk Space	500MB	1GB (for large databases)
Display	1280x800	1920x1080 or higher
Processor	Dual-core 2GHz	Quad-core 2.5GHz+
Network	Optional (for email)	Optional
Peripherals	-	Barcode scanner, Label printer

Supported Platforms:

- ✓ Windows 10, 11 (64-bit)
- ✓ macOS 10.13 High Sierra or later (Intel & Apple Silicon)
- ✓ Linux (Ubuntu 20.04+, Fedora 35+, Debian 11+)
